# BRONCO

Bronco is made from buffalo skin, which is known for its thickness and strength. After the first tanning process the skin is treated with vegetable extracts to give it its natural look. After this, the skin is washed and hand-waxed, which gives it a two-toning effect. To give it a vintage look the skin is washed again and polished after drying. The result of all this is that every bag has its own character with differences in shading and look. And because the skin is not sealed, the waxes can migrate over time, making your bag truly uniquely yours.
